

For Better

Response in GERD

# Finorlep<sup>®</sup>

Levosulpiride 25 mg Tablet

- Levosulpiride is metabolised through Liver.
- The anti-emetic and prokinetic effects of levosulpiride are unique and permit the treatment of a larger number of gastrointestinal disorders than other drugs in its class
- Levosulpiride increases the motility of solid as well as liquid while Itopride increases the motility of liquid only.
- Levosulpiride has better anti-emetic action than Itopride and Domperidone.

For Better Anti-Emetic Action
