

For the treatment in type 2 diabetes

# Juleptin<sup>®</sup>-M

**Teneligliptin 20 mg & Metformin 500 mg. SR Tablet**

Used To Help Control Blood Sugar Levels In Patients  
Affected By Type 2 Diabetes As A DDP-4 Inhibitor .

Significantly controls glycemic parameters with safety.

No dose adjustment is required in renally impaired patients.

Co-administered with metformin produced significant  
reductions in HbA1c in patients with T2DM  
without increasing the risk of hypoglycemia.
